SILHOUET-TONE™

# Bring your body out of the shadows and into the light

## What is cellulite?

Why does cellulite occur? No single cause explains it. Heredity, physical activity, nutrition, stress, and way of life all contribute to its formation. Cellulite is defined as an imbalance between the formation and elimination of fat in the cell. This imbalance culminates in cellulite's signature mark: the orange peel texture of the skin.

## The Lumicell Touch offers more than any treatment available today

The Lumicell Touch features the exclusive lumicell light-based technology. Combined with vacuum subdermal massage, this new technology yields amazing results. Natural skin functions are enhanced and the appearance of your skin is greatly improved. With its ability to focus on the cell, Lumicell Touch can treat cellulite more effectively.

The Lumicell Touch apparatus is a perfect combination of vacuum subdermal massage and light-based technology that yields firmer, more beautiful, smoother, and healthier looking skin.

## Scientific clinical tests and results (examples)

Before After 14 treatments

Lost an average of 10 inches  
(treatment alone)

Before After 14 treatments

Lost an average of 12 inches  
(treatment & good eating habits)

Before After 14 treatments

Lost 14 inches  
(treatment, good eating habits  
& light physical activity)

## What are the benefits of using Lumicell Light-based Technology?

Light plays a major role in all aspects of life, and cellulite is no exception. The Lumicell Touch uses infrared (850 nm) and magenta (660 nm) light. Infrared light is beneficial to the your metabolism. Furthermore, magenta light brings anti-aging properties to your cellulite treatment.

## The Deep Tissue Vacuum Massage Technique is reborn

Also known as the palper-rouler technique, subdermal tissue massage is highly effective in reducing cellulite.

- Re-oxygenates the skin
- Increases blood circulation
- Helps to eliminate muscular and vascular tensions
- Restores vital energy centers (circulatory, drainage and nutritive)

The result is supple, firmer, beautiful, youthful and smoother looking skin.

## Which regions of the body can be treated with the Lumicell Touch?

The Lumicell Touch is designed to treat cellulite where it appears. It can be used on arms, thighs, hips, and buttocks.

## When can I see visible results?

Age and skin condition determine the number of treatments needed to achieve optimum results. Usually, between 14 to 18 treatments are required.

## The Most Complete Cellulite Treatment

The Lumicell Touch provides a complete epidermal, dermal and hypodermal treatment of cellulite. It combines the most effective subdermal massage technique with the phenomenal application of Lumicell Touch Light-based technology to stimulate proper cell functions, naturally. The time has come to bring your skin out of the shadows and into the light.
