VIVESCENCE

Break free from all the rules  
and turn back the hands of time  
with VIVESCENCE®

Revolutionary New Program  
Synchronized Liftometry  
High Definition / Anti-Aging Science

MADE IN SWITZERLAND

## The wait is over take a step back in time

Have you ever dreamed about being able to go back to a point in your life when your skin radiated the freshness and exuberance of youth? What if you could stop the hands of time without having to give up all the wonderful experiences of adulthood? No need to believe in miracles to appreciate the latest scientific breakthroughs in the field of anti-aging, led by VIVESCENCE®

## Leave those aging worries behind!

Wrinkles? Loss of firmness?

Slackening skin? Lackluster complexion?

Let VIVESCENCE® free you from all your aging woes. Watch your skin become more luminous and let your true beauty shine through. Defy the rules of aging with VIVESCENCE®.

## The Effects of Synchronized Liftometry

After years of research and groundbreaking discoveries in the field of neurocosmetics, VIVESCENCE® has perfected what is known as Synchronized Liftometry, an age-control method that exponentially accelerates the skin's ability to restructure itself.

Synchronized Liftometry works like a youth-seeking GPS by honing in on the countless factors responsible for aging our skin and intervenes by reversing the aging process, reprogramming the mechanisms that keep the cells youthful.

## What is the secret behind the effectiveness of VIVESCENCE® formulations?

The answer is enhanced cell communication owing to ultra-powerful active ingredients derived from biotechnology. The performance of the various skin care lines – specially developed for maximum interaction and complementarity, is doubled, thanks to the quadruple action of the Lifto Metric device. Once replenished with energy, the cells reprogram their self-restructuring functions to maximum speed, fully restoring their ability to regenerate.

## Specific Professional Treatments signed VIVESCENCE®

VIVESCENCE® professional treatments enhance the results of the Synchronized Liftometry program. Of all the VIVESCENCE® anti-aging products in this line, these ones deliver the most powerful anti-aging action, which is boosted by three sources of energy thanks to the Lifto Metric device and its four distinct technologies.

Thermal energy, impulsed micro-currents, photobiostimulation and transdermal infusion act together and intensify the unique action of VIVESCENCE® cellular serums, stimulating and revitalizing fundamental life factors in the epidermis, dermis and platysma muscle.

Results are exceptional – the face is left looking completely rejuvenated, features are tightened, the contour is remodeled, the skin is visibly smoother and complexion is reawakened. Your true beauty shines through.

## VIVESCENCE® offers two complementary professional treatments

VIVESCENCE® professional treatments deliver rapidly visible results and considerable long-term improvements thanks to the synergy of the formulations and the leading edge technologies delivered by the Lifto Metric device.

### PRO COLL4

an extreme regenerating, shaping, restructuring and firming treatment that revitalizes each and every one of the skin's life factors.

### HYDRA MED

an intense replumping and hydrating treatment that helps reactivate the skin's natural hydration\* process.

# Treatment phases

## Phase 1 Hydra Thermic Intense hydration

Deeply hydrated, the skin becomes more receptive to skin care treatments. Its responsiveness and ability to absorb are optimized.

## Phase 2 Précisfiller Smooths and corrects wrinkles

The Précisfiller pen works on wrinkles deep within the skin by filling and visibly reducing their appearance. The skin is left looking incredibly smooth and completely rejuvenated.

## Phase 3 Nano Lift Lifting effect

Stimulating collagen production triggers outstanding firming action while strengthening the skin's support network. The oval of the face is completely redrawn and the biomechanical properties of the skin are restored.

## Phase 4 Lift Infusion Cellular regeneration

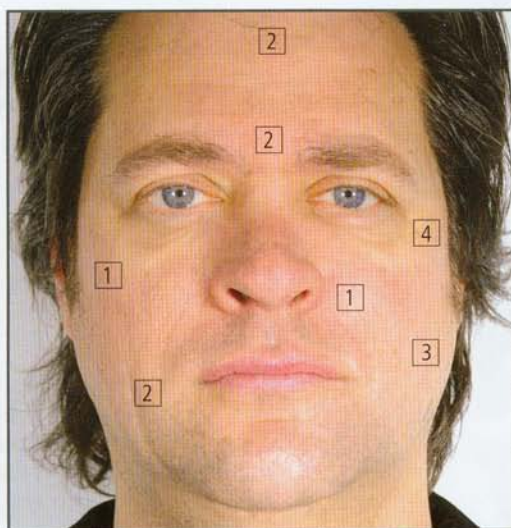

Cells are stimulated, regenerated, and revitalized, while cell renewal is boosted. The process of skin aging is slowed.

# Spectacular results

SUBJECT 1

before

after 6 treatments

- 1 The skin is intensely plumped up and regains volume
- 2 Fine lines and wrinkles are visibly smoother
- 3 The grain of the skin is smoothed out and tightened
